

White Paper:

\$BARK

(Bark-A-Lot)

© 2026

Executive Summary

In a world saturated with "serious" utility tokens and complex DeFi protocols, \$BARK is here to remind everyone that sometimes, you just need to make some noise. \$BARK is a dog-themed meme coin built for the community, by the community, and dedicated to the most persistent sound in nature: the bark. We aren't promising to revolutionize the global financial system. We're just promising to be the loudest dog in the yard.

The Vision

Our mission is simple: Maximum Volume. While other coins focus on "quiet growth," \$BARK thrives on hype, memes, and a relentless digital presence. If it isn't loud, it isn't \$BARK

Tokenomics (\$BARK-onomics)

We've designed our supply to be large enough for everyone to own a piece of the kennel, but structured enough to maintain momentum.

- Token Name: **Bark-A-Lot**
- Ticker: **\$BARK**
- Total Supply: **1,000,000,000 (1 Billion)**

(Note: Market cap depends on token price, not fixed at launch.)

Supply Distribution

- **Public Launch (60%)** → 600,000,000 tokens
- **Marketing & Hype (20%)** → 200,000,000 tokens
- **The Dog Park (10%)** → 100,000,000 tokens
- **Dev Kennel (5%)** → 50,000,000 tokens
- **Charity – Animal Shelters (5%)** → 50,000,000 tokens

Total: 1,000,000,000 tokens (100%)

THE "BARK" MECHANISM

To ensure the ecosystem stays healthy, \$BARK implements a simple-

- 3% transaction tax:
- 1% Burn: 1% of every transaction is permanently burned, reducing total supply over time and increasing scarcity
- 1% Auto-Liquidity: Helps maintain price stability
- 1% Marketing: Keeps the megaphone turned up to 11
